

Institute of Directors Scotland 2008

Annual Conference and Dinner at The Fairmont St Andrews

We were delighted to win the contract to technically produce this year's Annual Conference and Dinner for IoD Scotland. To take the event to the next level, we introduced the latest in event technology, our amazing Stealth modular LED backdrop.

Using a staggered set design, Stealth really came into its own as our expert creative team formatted fantastic graphics and moving images for an electrifying and dynamic stage set. A starcloth was used during the dinner to add to the glitzy look which doubled as a black backdrop for the conference.

A central screen showed the main presentation content for both the gala dinner and the daytime conference. With a modern lectern to compliment the overall stage set, we also provided a high quality PA system for great sound reproduction to support the guest speakers and presenter. The complete effect contributed to a highly successful, engaging event.

“Working with the team at Sound & Vision for this year's Institute of Directors Conference and Dinner was a real pleasure. The team was professional and pro-active so that the event went extremely smoothly. They delivered well within our budget and produced a really innovative and eye-catching stage set that was well received by our delegates.”

Thank you for your hard work!”
