

Hire Awards of Excellence 2009

Hire Association Europe and Event Hire Association award ceremony
London - 9th May 2009

A long established and glittering ceremony, the Hire Awards of Excellence recognise those who demonstrate very high standards and distinction within the hire industry. These are much sought after accolades provide a platform to help keep these businesses at the forefront of our ever changing industry.

Sound and Vision successfully won the contract to technically produce these fantastic awards. Using our fabulous Stealth LED video display wall as a central column feature set back in a solid stage flat design, we created a stunning design within the restrictions of a very narrow venue room! The stage flats were designed to create a 3-dimensional illusion as they were slightly set back from each other, all adding to our very attractive design.

With full show calling and stage management along with a supporting team of Sound and Vision's expert technicians, we provided autocue for the host - comedian Bob Mills - live camera shots and set up a sponsors loop on plasma screens in the drinks foyer for excellent sponsor exposure from the outset.

Filming the event from start to finish our team edited material for a post event DVD for the event organisers along with providing a suitable format for web-casting on their website so they can share the success of the event on an international level.

"An absolute pleasure to work with such a polished and professional organisation.

From pitch to production, I had such faith in Sound and Vision to produce a stunning show that I could focus my attention on everything else without any anxiety about the ceremony itself...I would not hesitate to use them again."
