

## PPI Awards

Paper and Pulp International Awards

Hilton Munich Park, Munich, Germany - October 2009

We headed to mainland Europe to produce the PPI Awards - a first for Sound and Vision as we have not produced an event in Munich before!

This awards ceremony was actually on the back of a day time conference that we also produced. We transformed the venue space from a corporate information sharing event to one of celebration - with time and budget constraints.

Our solution was to create a simple, yet visually impressive, set design using our versatile sails and star cloth as a back drop. With vibrant LED lights, we bathed the stage with a fabulously rich colour - echoing the event colour palette. Gobos broke up the block colour on the sails, creating fantastic effects.

The three screens showed the main presentation content with the two side screens also showing live camera images of the presenter, the winners and guest speakers.

This was the first time our client had organised these awards and they were delighted with the result!

*"Just wanted to say a big thank you... although a small event, it was a launch and for a new client so I was pretty nervous and am very pleased with how it went."*

*The feedback has been great...sponsors very happy and guests impressed. Our client is very happy with the final result and has lots of ideas to build on the programme for next year.*

*The production was slick and professional and I really appreciate the hard work. Have really enjoyed working with you."*
